A review of the 2025 Street and Utility Improvement Project Area will be occurring over the next few weeks. The purpose of this review will be to assemble a punch list of repairs needed on the Project. This is likely to include some repairs to concrete cracks in curbs, driveways, and sidewalks. Topsoil placement and overseeding of some grass boulevards is also expected to improve growth. These repairs are expected to occur within the next 4 to 6 weeks.

The final placement of blacktop on city streets will occur in May or June.

It should be noted that the Project includes a 2-year warranty on work performed, starting from the point of final payment. Because of this, the warranty is likely to be in-place until late 2028.

If you have any questions or concerns, feel free to contact me or RPR Doug Maeder.

Chris Knutson, Project Manager/City Engineer
